

Homework 5: Due 4/6/2020

Do problems 1-7 in chapter 27 of OSTEP.

The crux might be installing valgrind. Some Linux systems have it installed (type “which valgrind” to see if it has been installed.) If not, you’ll need to install and build it.

Download the compressed file and build:

wget <https://sourceware.org/pub/valgrind/valgrind-3.15.0.tar.bz2>

```
tar xjf valgrind-3.15.0.tar.bz2
```

```
cd valgrind-3.15.0
```

```
./configure
```

```
make
```

```
make install
```

If you don’t have privileges, you can try

```
VALGRIND_LIB=~/.lib/valgrind
```

```
export VALGRIND_LIB
```

```
./configure --prefix=~/.lib
```

```
make
```

```
make install
```
